Nicolás Alderete

Customer Service Supervisor | Operations Reporting Analyst

Buenos Aires, Argentina

nicoalderete.github.io · LinkedIn · GitHub

PROFILE

I combine operational Customer Service supervision with data analytics, reporting and automation. I develop reports, dashboards and tracking tools to organise information, make performance visible and support management decisions.

EXPERIENCE

deRentas Carsharing · March 2025 - Present

Customer Service supervision and operational reporting. Progression from fleet operations supervision towards a role focused on metrics and analytics.

• Prepare and review recurring departure reports, including reason classification, segmentation and communication of findings.

• Track customer and operational metrics, defining cutoffs, calculation criteria and review priorities.

• Develop tracking and automation tools in Google Sheets and Apps Script, including inspection scheduling.

• Prepare information for supervisors and management, connecting metrics with context and next steps.

SELECTED PROJECTS

Top 100 Airports - Python and SQL. Exploratory analysis and a learning extension with CSV validation, SQLite, analytical views and load auditing.

Commercial analytics - Power BI and Tableau. Academic sales projects by period, product and city, with documented evidence and limitations.

TOOLS

Excel · Google Sheets · SQL · Python / Pandas · Power BI · DAX · Tableau · Google Apps Script · SQLite

TRAINING

IBM Data Analyst Professional Certificate. Training in Excel, SQL, Data Analytics and Tableau at Coderhouse.

PROFESSIONAL DEVELOPMENT

Developing towards Data Engineering, with an interest in integration, transformation, data quality and reproducible processes.
